

Advocate Health 2023 scope 1 & 2 emissions

As part of our focus on environmental sustainability, we're reporting our 2023 scope 1 & 2 greenhouse gas inventory. We'll use this inventory to measure progress and identify priority areas for our carbon reduction efforts.

This footprint was calculated using the [Greenhouse Gas Protocol](#) using the operational control boundary.

Scope 1: Direct emissions		303,149 MT CO₂e
32%	Facilities fuel (natural gas & fuel oil)	253,178
3%	Refrigerant	24,210
1%	Fleet	8,238
2%	Fugitive emissions	17,522
Scope 2: Indirect emissions (market-based)		483,888 MT CO₂e
1%	Steam	3,711
61%	Electricity	480,177
Total emissions		787,037 MT CO₂e
