

Executive Health

The best in health care. Centered on leadership.

It begins with the executive physical. Join us in our executive suite at Aurora Health Care St. Luke's Medical Center on a day that works with the executive's schedule. This annual exam offers exceptional care while building a strong foundation for maximum wellness. The team reviews medical history, assesses potential risk factors and creates a wellness plan tailored to their health care needs.

The Executive Physical Includes:

- A multidisciplinary team approach to care
- Extensive laboratory testing
- Enhanced diagnostic testing
- A comprehensive physical exam
- Fully coordinated services
- Post-exam recommendations and follow-up report

Easy and Efficient

A nurse coordinator will work with the executive to arrange a complete schedule of care to ensure the visit is comprehensive and efficient.

The nurse coordinator is the single point of contact for:

- Communicating between the executive and the care team
- Answering any questions
- Connecting the executive with additional resources
- Collecting and preparing medical records and all paperwork

World-class Care

Advocate Health and Aurora Health Care provide the highest level of personalized care and convenience, so your team can live well, stay focused and lead the way. It is best-in-class health care designed to take your organization further.

- Rated among the top 1% of hospitals by U.S. News & World Report
