Dedicated Employer Health Clinics

Preventive Care, Primary Care and Urgent Care

Easily accessible health care saves employers and employees time and money. Services delivered through our dedicated employer health clinics are fully customizable.

Customized to Meet Your Organization's Needs

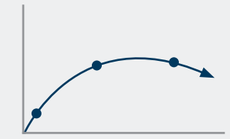
- On-site, near-site and virtual care delivery options.
- From a full-time staff led by a physician or dedicated clinician, to a single RN health coach providing care a few days a week.

Benefits of Employer-Based Health Care

- Illnesses are diagnosed and treated sooner, shortening time away from work and helping prevent more serious conditions.
- Patients are diverted from the emergency department or urgent care for minor illnesses and injuries.
- Virtual on-demand care is available after-hours and on weekends.
- In collaboration with the Third Party Administrator (TPA) or benefits partner, high-cost claimants and those with rising risk are directly engaged to change their health trajectory and, subsequently, the cost of care.
- Employees and families are connected to existing employer resources and benefits.
- Helps increase employee satisfaction and reduce turnover.

On-site services can include:

- **Primary Care** with a physician assistant (PA) or nurse practitioner (NP).
- **Wellness and Sick Care** with an RN, PA or NP.
- **Behavioral Health Care and Support**, such as counseling, coaching, Mental Health First Aid training and virtual care team integration with a clinician.
- **Medication Dispensing** delivered by the clinic provider who prescribes the medication. This helps employees get well faster, decreases time away from work and improves medication compliance.
- **Care Navigation** provided by RN health coaches who direct employees to the right place, at the right time, for the right level of care. This includes scheduling an appointment with a new primary care provider or advising how to access behavioral health resources.
- **Health Coaching** to help employees make behavior changes so they can achieve better overall health.
- **Occupational Medicine Services**, including acute injury assessment, treatment and follow-up care; injury re-evaluation/return to work; pre-employment and annual physicals; Department of Transportation physicals; respirator fit testing; vision and hearing screenings; drug and alcohol screenings and more.
- **Routine and Preventive Vaccinations** such as flu, hepatitis B.
- **Classes and Education** for nicotine cessation, stress reduction, weight management, diabetes prevention and more.
- **Customized Wellness Website** available for program or service registration, plus resources to help your employees get healthier.



USING DATA TO BEND THE COST CURVE

Advocate Health Solutions uses a targeted population health approach in reviewing claims data and risk scores to identify areas of focus for improving health and reducing costs. We analyze medical and pharmacy claims and identify plan participants with rising risk and spending associated with behavior-related conditions. Our nurses and providers can then engage employees in meaningful ways that improve overall health and drive health care costs down.
