ADVOCATE HEALTH

# SOLUTIONS for employers

Health care costs are projected to continue to increase significantly, with even greater emphasis on employee mental health. Plus, ongoing workforce shortages will put additional strain on employer resources and workplace culture.
***We have a solution for you.***

ADVOCATE HEALTH

# SOLUTIONS for employers

## Better health equals better results

Our employer services provide easy access to engaging health care and wellness programs designed to curb health care costs and ensure a healthier, more productive workforce. How?

- With care, education, screening and prevention available at their place of work, employees are sick less often and miss less work. This means less absenteeism, more productivity and increased employee satisfaction.
- Relationship-based care and effective health coaching for employees lead to positive behavior changes, earlier intervention, fewer serious illnesses and better management of chronic conditions — all of which drive down health care costs.
- Being healthier and happier enriches employees' lives and leads to a healthier bottom line.

Employer services from Advocate Health Solutions are delivered by Atrium Health. They are designed to keep people well and working by improving access to health care, increasing value for employees and clients and improving health outcomes.

## Our process is *simple, smart and strategic*

- We begin by listening – to business leaders and employees. We seek to understand each client's business, goals, culture, workforce demographics and work environment.
- Next, we do a thorough review of available health data of employees and beneficiaries on the health plan.
- We then use this information to identify the services and delivery model that are right for each individual client. We assess these services constantly, applying new tools and services as they become available.

## An *effective, whole-person* approach to wellness

We are experts across all aspects of workplace health care. However, we go far beyond these areas to develop customized solutions for each client. Our focus is on making health care easy for employees by delivering effective, efficient care through our robust, connected electronic health records and our network of specialists.

Instead of just treating symptoms, we care for the whole person, offering individualized intervention that is effective, practical and convenient. We meet with employees at work or in our clinics to help them make lifestyle changes, monitor and manage chronic conditions, and engage available resources in ways that have a meaningful impact on their well-being.

Employers get a dedicated team with an entrepreneurial mindset and a single point of contact.
