As part of our focus on environmental sustainability, we’re reporting our 2022 scope 1 & 2 greenhouse gas inventory. We’ll use this inventory to measure progress and identify priority areas for our carbon reduction efforts.

**Scope 1: Direct emissions**

- **Facilities fuel (natural gas & fuel oil):** 257,467 MT CO₂e (31%)
- **Refrigerant:** 22,835 MT CO₂e (3%)
- **Fleet:** 8,833 MT CO₂e (1%)
- **Fugitive emissions:** 19,671 MT CO₂e (2%)

**Scope 2: Indirect emissions (market-based)**

- **Steam:** 4,413 MT CO₂e (1%)
- **Electricity:** 498,259 MT CO₂e (62%)

**Total emissions:** 811,478 MT CO₂e

This footprint was calculated using the [Greenhouse Gas Protocol](https://www.epa.gov/greenhouse-gas-equivalencies-calculator) using the operational control boundary.
